A. Introduction

Purpose

The information contained in this document is for ORIX Asia Limited ("the Company") to comply with the Banking (Disclosure) Rules.

Basis of preparation

The Company has adopted the "basic approach" for the calculation of the risk-weighted assets for credit risk, "current exposure method" for the calculation of counterparty credit risk and "basic indicator approach" for the calculation of operational risk.

During the year ended 31 March 2018 and for the six months ended 30 September 2018, market risk arising from the Company's trading book was minimal. The Company has been granted exemption by the HKMA as it can fulfil the exemption criteria set out in sections 22(l)(a) and (b) of the Banking (Capital) Rules. Hence, the Company was exempted from the calculation of market risk.

B. Key prudential ratios

Notes to the Template

	Description	Hong Kong basis	Basel III basis	
9	Other intangible assets (net of associated deferred tax liabilities)	0	0	
	Explanation As set out in paragraph 87 of the Basel III text issued by the Basel Committee (December 2010), mortgage servicing rights ("MSRs") may be given limited recognition in CET1 capital (and hence be excluded from deduction from CET1 capital up to the specified threshold). In Hong Kong, an AI is required to follow the accounting treatment of including MSRs as part of intangible assets reported in the AI's financial statements and to deduct MSRs in full from CET1 capital. Therefore, the amount to be deducted as reported in row 9 may be greater than that required under Basel III. The amount reported under the column "Basel III basis" in this box represents the amount reported in row 9 (i.e. the amount reported under the "Hong Kong basis") adjusted by reducing the amount of MSRs to be deducted to the extent not in excess of the 10% threshold set for MSRs and the aggregate 15% threshold set for MSRs, DTAs arising from temporary differences and significant investments in CET1 capital instruments issued by financial sector entities (excluding those that are loans, facilities or other credit exposures to connected companies) under Basel III.			
10	Deferred tax assets (net of associated deferred tax liabilities)	524,687	524,687	
	Explanation As set out in paragraphs 69 and 87 of the Basel III text issued by the Basel Committee (December 2010), DTAs of the bank to be realized are to be deducted, whereas DTAs which relate to temporary differences may be given limited recognition in CET1 capital (and hence be excluded from deduction from CET1 capital up to the specified threshold). In Hong Kong, an AI is required to deduct all DTAs in full, irrespective of their origin, from CET1 capital. Therefore, the amount to be deducted as reported in row 10 may be greater than that required under Basel III. The amount reported under the column "Basel III basis" in this box represents the amount reported in row 10 (i.e. the amount reported under the "Hong Kong basis") adjusted by reducing the amount of DTAs to be deducted which relate to temporary differences to the extent not in excess of the 10% threshold set for DTAs arising from temporary differences and the aggregate 15% threshold set for MSRs, DTAs arising from temporary differences and significant investments in CET1 capital instruments issued by financial sector entities (excluding those that are loans, facilities or other credit exposures to connected companies) under Basel III.			
18	Insignificant capital investments in CET1 capital instruments issued by financial sector entities that are outside the scope of regulatory consolidation (amount above 10% threshold)	0	0	
	Explanation For the purpose of determining the total amount of insignificant capital investments in CET1 capital instruments issued by financial sector entities, an AI is required to aggregate any amount of loans, facilities or other credit exposures provided by it to any of its connected companies, where the connected company is a financial sector entity, as if such loans, facilities or other credit exposures were direct holdings, indirect holdings or synthetic holdings of the AI in the capital instruments of the financial sector entity, except where the AI demonstrates to the satisfaction of the MA that any such loan was made, any such facility was granted, or any such other credit exposure was incurred, in the ordinary course of the AI's business. Therefore, the amount to be deducted as reported in row 18 may be greater than that required under Basel III. The amount reported under the column "Basel III basis" in this box represents the amount reported in row 18 (i.e. the amount reported under the "Hong Kong basis") adjusted by excluding the aggregate amount of loans, facilities or other credit exposures to the AI's connected companies which were subject to deduction under the Hong Kong approach.			
19	Significant capital investments in CET1 capital instruments issued by financial sector entities that are outside the scope of regulatory consolidation (amount above 10% threshold)	0	0	

Regulatory Disclosure Statement for the six months ended 30 September 2018 (unaudited)

	Description	Hong Kong basis	Basel III basis	
	Explanation For the purpose of determining the total amount of significant capital investments in CET1 capital instrumer issued by financial sector entities, an AI is required to aggregate any amount of loans, facilities or other cred exposures provided by it to any of its connected companies, where the connected company is a financial sect entity, as if such loans, facilities or other credit exposures were direct holdings, indirect holdings or synther holdings of the AI in the capital instruments of the financial sector entity, except where the AI demonstrates the satisfaction of the MA that any such loan was made, any such facility was granted, or any such other credit exposure was incurred, in the ordinary course of the AI's business. Therefore, the amount to be deducted reported in row 19 may be greater than that required under Basel III. The amount reported under the colum "Basel III basis" in this box represents the amount reported in row 19 (i.e. the amount reported under the "Hoi Kong basis") adjusted by excluding the aggregate amount of loans, facilities or other credit exposures to the Aconnected companies which were subject to deduction under the Hong Kong approach.			
39	Insignificant capital investments in AT1 capital instruments issued by financial sector entities that are outside the scope of regulatory consolidation (amount above 10% threshold)	0	0	
Explanation The effect of treating loans, facilities or other credit exposures to connected companies sector entities as CET1 capital instruments for the purpose of considering deductions to be the capital base (see note re row 18 to the template above) will mean the headroom available for the exemption from capital deduction of other insignificant capital investre instruments may be smaller. Therefore, the amount to be deducted as reported in row 39 that required under Basel III. The amount reported under the column "Basel III basis" in the amount reported in row 39 (i.e. the amount reported under the "Hong Kong basis") adjust aggregate amount of loans, facilities or other credit exposures to the AI's connected consubject to deduction under the Hong Kong approach.			calculating e threshold AT1 capital reater than resents the cluding the	
54	Insignificant capital investments in Tier 2 capital instruments issued by financial sector entities that are outside the scope of regulatory consolidation (amount above 10% threshold)	0	0	
Remai	Explanation The effect of treating loans, facilities or other credit exposures to connected companies which are fina sector entities as CET1 capital instruments for the purpose of considering deductions to be made in calculated the capital base (see note re row 18 to the template above) will mean the headroom within the three available for the exemption from capital deduction of other insignificant capital investments in Tier 2 calculated instruments may be smaller. Therefore, the amount to be deducted as reported in row 54 may be greater that required under Basel III. The amount reported under the column "Basel III basis" in this box represents amount reported in row 54 (i.e. the amount reported under the "Hong Kong basis") adjusted by excluding aggregate amount of loans, facilities or other credit exposures to the AI's connected companies which is subject to deduction under the Hong Kong approach.		calculating e threshold er 2 capital reater than resents the cluding the	

Remarks:

The amount of the 10% threshold mentioned above is calculated based on the amount of CET1 capital determined in accordance with the deduction methods set out in BCR Schedule 4F. The 15% threshold is referring to paragraph 88 of the Basel III text issued by the Basel Committee (December 2010) and has no effect to the Hong Kong regime.

A default is considered to have occurred with regard to a particular borrower when either or both of the following events have taken place:

- a) Subjective default: Borrower is considered to be unlikely to pay its credit obligations in full, without taking action such as realising security (if held).
- b) Technical default: Borrower is more than 90 days past due on any credit obligation.

Table CR3: Overview of recognized credit risk mitigation

The following table presents the extent of credit risk exposures covered by different types of recognized CRM as at 30 September 2018:

	(a)	(b1)	(b)	(d)	(f)
	Exposures unsecured: carrying amount (USD)	Exposures to be secured (USD)	Exposures secured by recognised collateral (USD)	Exposures secured by recognised guarantees (USD)	Exposures secured by recognised credit derivatives contracts (USD)

Of which defaulted	6,115,955	492,179	-	492,179	-

Note: Amounts reported under column (b1) represent exposures which have at least one recognized CRM (collateral, financial guarantees, or credit derivative contracts) associated with them.

The allocation of the carrying amount of multi-secured exposures to different forms of recognized in columns (b), (d) and (f) is made by order of priority, starting with the form of recognized CRM expected to be called first in the event of loss, and within the limits of the carrying amount of the secured exposures.

<u>Template CCR5: Composition of collateral for counterparty default risk exposures (including those for contracts or transactions cleared through CCPs)</u>

The following table presents a breakdown of all types of collateral posted or recognised collateral received to support or reduce the exposures to counterparty default risk exposures as at 30 September 2018 in respect of derivative contracts or SFTs entered into, including contracts or transactions cleared through a CCP:

	(a)	(b)	(c)	(d)	(e)	(f)

Total	-	-	-	-	-	-	

As of 30 September 2018, the notional amount of currency derivatives contracts was USD257,500,000. There was no recognised collateral received and posted collateral for these derivative contracts. And, the Company does not have securities financing transaction exposures.

Template CCR6: Credit-related derivatives contracts

The Company does not have such exposures as at 30 September 2018.

Template CCR8: Exposures to CCPs

The Company does not have such exposures as at 30 September 2018.

-

¹ For "Collateral used in SFTs" reported in column (e) and (f), the collateral used is defined as referring to both legs of the transaction. For example, a company transfers securities to a third party, which in turn posts collateral to the Company. The Company should report both legs of the transaction in the template; on one hand the collateral received is reported in column (e), on the other hand the collateral posted by the Company's reported in column (f).

² "Domestic currency" refers to the Company's reporting currency (not the currency/ currencies in which the derivative contract or SFT is denominated).

F. Risk-Weighted Amount, Credit risk and Counterparty risk, and Market risk (Continued) Part IV Securitization exposures

No securitization exposures disclosure as at 30 September 2018.

Part V Market risk

During the year ended 31 March 2018 and for the six months ended 30 September 2018, market risk arising from the Company's trading book is minimal. The Company has been granted exemption by the HKMA as it can fulfil the exemption criteria set out in sections 22(l)(a) and (b) of the Banking (Capital) Rules. Hence, the Company was exempted from the calculation of market risk.
